E. CHILD'S LOCATION

Seung Yub's foster home is located in an area about 20 minutes by bus from Holt. It's a large, well-ordered and neat two-story house. This family consists of the father, 50, a businessman, the active mother, 43, two sisters, a collegian(junior) and 12th grader, and one brother, a 10th one. They, all Christians, have paid a great deal of attention to this baby, always having a good home.

F. EVALUATION AND RECOMMENDATION

Seung Yub is somewhat behind in weight and height compared to his peers. After placement in the foster home, he received treatment for neonatal hyperbilirubinemia at the Holt Clinic. Currently, he is in good condition with fine feeding and sleeping. It's expected that he will become healthier and active in motor coordination under the foster mother's good care. It's hoped that he will be adopted by a good family as soon as possible.

5. Reason for Relinquishment:

After graduation from high school, the natural mother went up to Seoul and was employed by a company. During this time, she met her first lover and a baby was born. However, they didn't want to be married and parted on the assumption that the man would raise the baby. The natural mother changed to other company and met the natural father 4 years ago. While they had many intimate meetings, she became pregnant. When she was 5 months pregnant, she informed the natural father of it but came to know that he was a married man with two children. This baby was born, but she couldn't be married to the natural father and was in adverse circumstances to bring up him normally. For the sake of his optimum development, she finally decided to refer him for adoption.

6. Particulars on child's developmental history and child's attitude

toward adoption:

Since this baby was admitted on 6/18/88, he has been cared for in a foster home. He appears to be healthy and cute.
